

HE WON HIS BATTLE WITH CANCER. WILL YOU?

At age 57 world-renowned pianist Martin Berkofsky was diagnosed with prostate cancer. Today, at age 60, he is a cancer survivor.

Martin didn't settle for what was available close to home. He searched for a treatment path that would give him back his life. He found it at Cancer Treatment Centers of America.

No one, including a cancer patient, should be expected to live a single day without hope. Come hear his story of recovery as "a life changing and life affirming experience." Come share the gift of his life as he plays his favorite music for you.

Join us for a special
